PREFACE

The Government used to compile and publish District Manuals for each district prior to 1905. The manuals became obsolete within a few years of their publication, containing as they did not only matter of a more or less permanent character such as physical characteristics, history, religion and ethnography, as also statistical matters which soon became out of date. The Government decided to replace the District Manuals by another publication known as the District Gazetteer, consisting of two volumes, A and B. The A volume contained descriptive matter and such general figures, as might be necessary to explain the text, and the B volume contained detailed statistics. They also decided that the B volume should be brought out periodically, especially after each decennial census. Between 1905 and 1927 A volumes for thirteen districts were published. In 1927 they were discontinued. B volumes for all the districts were published between 1906 and 1915. They were continued to be published even after the 1931 census. They were not published after the 1941 census.

Village Statistics, containing the results of the census for every village in the State, were first compiled and published in 1872, at the instance of Mr. C. E. Gover, who was then the Census Officer in Madras. His successor, in 1882, considered that this publication led to needless expenditure and trouble in printing the tables villagewar, but the Government decided that the Village Statistics should continue to be published. The practice of issuing Village Statistics at every census was followed subsequently. The Village Statistics merely showed the number of occupied houses and population of each village and town by religions.

The idea of preparing the present volume, viz., the District Census Handbook for each district was put forward by Sri R. A. Gopalaswami, I.C.S., Registrar-General, India, and ex-officio Census Commissioner of India, as part of a plan intended to secure an effective method of preserving the census records prepared for areas below the district level. He proposed that all the district census tables and census abstracts prepared during the process of sorting and compilation should be bound together in a single manuscript volume, called the District Census Handbook, and suggested to the State Governments that the handbook (with or without the addition of other useful information relating to the district) should be printed and published, at their own cost, in the same manner as the Village Statistics in the past. In accepting this suggestion, the Government of Madras decided to print and publish the more important portion of statistical data relating to the district and to preserve the rest of the records in a manuscript volume for any future use, to which they may be put.

2. The statistical data embodied in the District Census Handbook have to be understood from the background of the changes introduced in the 1951 census. The most important and fundamental change introduced in the 1951 census consists in the substitution of an economic classification of the people for the classification based on Religion and Communities

adopted in the past. The people were divided into two broad livelihood categories, the Agricultural and Non-Agricultural. Four agricultural classes and four non-agricultural classes were prescribed as shown below :—

Agricultural Classes—

I. Cultivators of land, wholly or mainly owned, and their dependants,

II. Cultivators of land, wholly or mainly unowned, and their dependants,

III. Cultivating labourers and their dependants,

IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

Non-Agricultural Classes—

Persons (including their dependants) who derive their principal means of livelihood from—

V. Production other than cultivation,

VI. Commerce,

VII. Transport, and

VIII. Other services and miscellaneous sources.

Each of the above eight livelihood classes were divided into three sub-classes with reference to their economic status as below :—

(i) Self-supporting persons,

(ii) Non-earning dependants, and

(iii) Earning dependants.

These livelihood sub-classes have been defined in detail in the fly-leaf notes attached to Economic Table B-I included in this Handbook.

All non-earning dependants are economically passive, all earning dependants are economically semi-active. All self-supporting persons are ordinarily economically active, but the classes and groups specified below constitute an exception to this rule :—

(1) Self supporting persons of Agricultural Class IV,

(2) Self-supporting persons of Livelihood Class VIII, who derive their principal means of livelihood from any source other than through economic activity, viz.—

(*a*) Non-working owners of non-agricultural property ;

(*b*) Pensioners and remittance holders ;

(*c*) Persons living on charity and other persons with unproductive occupations , and

(*d*) Inmates of penal institutions and asylums.

Economically active persons engaged in cultivation are either cultivators or cultivating labourers. Economic Table B-I gives particulars of the population classified according to eight livelihood classes and three sub-classes mentioned above.

Economically active persons engaged in industries and services have been classified with reference to the nature of the commodity produced or service performed. They are further divided into three sections, viz., Employers, Employees and Independent Workers.

Economic Table B-III gives particulars of the economically active persons classified under the divisions and subdivisions of industries and services of the Indian Census Economic Classification Scheme.

Table C-I included in this Handbook covers the population of sample households and Tables C-II and C-IV cover a 10 per cent sample population. The method adopted for extracting these samples has been described in detail in the fly-leaf notes attached to the relevant tables.

3. *Scheme of the Census Handbook.*—The Handbook has been divided into two parts; Part I consists of three sections, namely, Section (i) containing the general population tables (A series), the Economic Tables (B series), Summary figures for Taluks (Table E), Tables I, II and III relating to Small-scale Industrial establishments and Table L showing the Incidence of Leprosy; Section (ii) containing the Rural statistics and Section (iii) containing the Urban statistics; and Part II containing the Household (size) Table C-I, and Tables showing Livelihood classes and Literacy by Age-groups (C-II and C-IV), the Social and Cultural Tables (D series) and an abstract of non-agricultural occupations in the district. Among the tables included in the Handbook, Table A-IV—Towns classified by population with variations since 1901, Economic Table B-II—Secondary means of livelihood under each livelihood class and Table C-II—Livelihood classes by age-groups furnish information at the district level. The other population tables in the A series, the summary figures for taluks (Table E) and the Infirmity (Table L) showing the incidence of leprosy furnish information for each taluk in the district with a district total. The rural statistics in Part I—Section (ii) furnish basic information in respect of every village and town arranged according to census tracts. In addition to the total population of the villages, and its distribution among the eight livelihood classes, information regarding the number of literates, the cultivated area, the number of small-scale industrial establishments under categories, textile and non-textile and the number of leprosy cases and doubtful cases has been included.

The Urban statistics in Part I, Section (iii) furnish similar information except that relating to cultivated area in respect of every unit classified as city or census town in the district with ward-wise data. All other tables included in the Handbook provide information for units called census tracts with totals for the district.

4. *Census Tracts.*—A distinctive feature of the census statistics is its rural urban break up designed with a view to compare the conditions and characteristics of the rural and urban population. The rural areas of each district were therefore kept distinct from the urban areas. For facilitating tabulation these areas were divided into a number of rural and urban tracts. As far as possible, the rural area in each taluk was constituted into a single rural tract. In a few cases however where the taluks were small in size with reference to their population, the rural areas of more than one taluk were taken together as a single rural tract. The urban tracts have been formed out of areas declared as cities and census towns in each district. Every city was treated as a separate tract. Towns other than cities were grouped together to form non-city urban tracts. Wherever possible, the towns in each taluk were constituted into a single non-city urban tract. In cases where the towns in a taluk had a population of less than 50,000 the towns in more than one taluk were grouped

together to form a non-city urban tract. All the rural tracts in the State have been assigned numbers in one series, the non-city urban tracts in another series and the city tracts in a third series. In all the tables where the data have been furnished for tracts, the tracts have been denoted by numbers that have been assigned to them. A list of tracts into which the district has been divided and the areas comprised in each is furnished in the fly-leaf note to Economic Table B-I relating to the district.

The districts, taluks and villages mentioned in the Tables and Abstracts have been shown along with the census location code numbers assigned to them for purposes of census operations.

The numbers given to the Tables in this publication correspond to those given in the State Census Report.

Elaborate notes explaining the scheme of each Table have been introduced in the fly-leaf attached to each with a view to enable the reader to get a precise idea of the data furnished in the Table.

5. *Tables relating to Small-scale Industries.*—In the year 1950 a census of Small-scale Industries was instituted under the orders of the Government. The object was to get some idea about small industries such as cottage and home industries, small establishments, workshops, etc., where articles were produced, repaired or otherwise treated for sale, use or disposal and small mines. The enquiry was confined to establishments to which the Factories Act was not applicable. Individuals who worked on their own and did not employ other people were left out of account. From the data collected three Tables were prepared and they have been included in the Handbook. Information giving village-wise and ward-wise information for Small-scale Industries have been incorporated in the rural and urban statistics. The details collected and embodied in the Tables are not to be considered accurate or exhaustive, as the enumeration staff employed had not been trained for the purpose and some cases of under enumeration were noticed. However, the figures given in the Tables may be sufficient to give an insight into the nature of the industries prevalent in the different parts of the district.

6. Opportunity has been taken to put in a short introductory note detailing the salient points connected with the district, such as the physical features, climate, rainfall, irrigation and drainage facilities, roads and other communications, crop statistics, education, industries and other matters of general interest. The information contained in the introductory note is based on the materials furnished by Collectors of districts and Departments of Government. The District Gazetteer was also freely referred to. The relevent paragraph of the 1951 Census Report discussing the growth of population in the district has also been incorporated in the proper place.

A district map showing taluk boundaries, physical features, important roads and places with a population exceeding 5,000 is also attached.

It is hoped that this Handbook will serve as a book of reference on matters relating to the district and that it will be found useful both by Departments of Government and the public.

INTRODUCTION TO COIMBATORE DISTRICT

I. (*a*) *Situation and physical characteristics.*—The Coimbatore district lies between 76° 39′ and 77° 56′ of the eastern longitude and 10° 12′ and 12° 20′ of the northern latitude. The district is elongated from north to south. It is bounded on the north by the Mysore State and the Salem district, on the east by the Salem and the Tiruchirapalli districts, on the south by the Madurai district and the United State of Travancore and Cochin and on the west by the districts of Malabar and the Nilgiris and the Mysore State. In 1950 Badagalpur village of Mysore State was absorbed in Coimbatore district. The district consists of ten taluks comprised in three Revenue Divisions as detailed below :—

Name of Revenue Division.	Headquarters of Revenue Division.	Taluks comprised in the Revenue Division.	Area in square miles.	Headquarters of the taluk.
Pollachi	Pollachi	Coimbatore	528	Coimbatore.
		Pollachi	709	Pollachi.
		Udumalpet	555	Udumalpet.
Erode	Erode	Palladam	585	Tiruppur.
		Dharapuram	854	Dharapuram.
		Erode	599	Erode.
Gobichettipalayam	Gobichettipalayam	Gobichettipalayam	1,129	Gobichettipalayam.
		Kollegal	1,076	Kollegal.
		Avanashi	493	Avanashi.
		Bhavani	572	Bhavani.
		Total	7,100	

Kollegal taluk and portions of Gobichettipalayam and Bhavani taluks which are in the northern part of the district have a general elevation ranging from 2,000 to 3,000 feet above sea level with hill ranges of various heights and are continuations of the Mysore Plateau. The general aspect of the rest of the district is that of an undulating plain sloping gradually towards the east and south-east except for a small area in the extreme west. The plains are surrounded by lofty hills on the north, south and west and are broken by a few scattered hills of low elevation such as the Chennimalai of Erode taluk and Sivanmalai of Dharapuram taluk.

Hills.—The Anamalais which are a part of the Western Ghats and which are connected with the Palni hills of the Madurai district are situated in the southern part of Udumalpet and Pollachi taluks. There are several plantations on the hills. The Anamalais attain altitudes up to 8,000 feet.

The Velliangiris are spurs of the Nilgiris Mountains on the west and north-west of the district.

The Sholakarai and Bolampatti hills lie partly in Coimbatore and partly in Malabar district.

The Lambton peak range is an offshoot of the Bolampatti range and overlooks Coimbatore town.

The Hassanur, Bargur, the Kokarai (Mahadeshwara), the Punachi and the Billigirangam hills are all on the Plateau portions with peaks above 4,000 feet. The Billigirangam hills on the western border of Kollegal taluk and eastern border of Mysore State attain heights up to 6,000 feet.

The Bargur hills are situated in Bhavani taluk and are connected with the Kollegal hills.

(*b*) *Rivers.*—The chief rivers in the district are the Cauvery and its tributaries, the Bhavani, the Noyyal and the Amaravathi.

The Cauvery coming from the Mysore State flows along the northern and eastern boundaries of the Kollegal taluk and enters the Salem district. After flowing through that district in Omalur taluk where it is dammed at Mettur, it again flows along part of the eastern boundary of Bhavani taluk and the entire eastern boundary of Erode taluk before it enters Tiruchirapalli district.

The Bhavani is a perennial river and rises Malabar district. It flows on the north-western part of Avanashi taluk and across Gobichettipalayam taluk and thence on the southern part of Bhavani taluk eventually joining the Cauvery at Bhavani. The Bhavani is fed by the Moyar river in Gobichettipalayam taluk.

The Noyyal rises in the Bolampatti valley, west of Coimbatore town. It flows across Coimbatore and Palladam taluks and between Erode and Dharapuram taluks and enters Tiruchirapalli district where it joins the Cauvery.

The Amaravathi has its source in the Anamalais and Travancore Hills which border the Udumalpet taluk, descends along the Anjanad valley and flows through the eastern portion of Udumalpet taluk and across Dharapuram taluk. It enters Tiruchirapalli district and joins the Cauvery. It is fed by the Uppar in Dharapuram taluk.

The Palar and Aliyar rivers rise in the Anamalais and flow westwards in Pollachi taluk.

(c) *Forests.*—A large portion of the district is covered with forests. There are two main groups of forests, viz., (1) the hill forests in Kollegal, Bhavani and Gobichettipalayam taluks in the north and (2) the Anamalai forests in Pollachi and Udumalpet taluks in the south. There are some forests in the western part of Coimbatore taluk.

The particulars of the area and classification of forests in the various taluks of the district are furnished below :—

Name of taluk.	Area of Reserved forests (square miles).	Private forests (square miles).	Total (square miles).
Kollegal	727·36	24·12	751·48
Gobichettipalayam	600·10	..	600·10
Bhavani	310·73	..	310·73

Udumalpet	223·55	..	223·55
Total	2,272·16	24·12	2,296·28

The Reserved forests contain mixed deciduous species with poor girth and height. In certain places however the forest attains good density and dimensions. Sandal occurs abundantly. Higher up and in the interior valleys there are valuable timber trees such as teak, rosewood, etc. Sleepers are extracted from evergreen areas. The forests in the southern part of the district abound in elephants, bison, deer and other wild game.

The private forest is scrub jungle with scattered sandalwood.

(d) *Climate and rainfall.*—The particulars of the average annual rainfall and the average number of rainy days in a year in the various taluks are furnished below :—

Name of taluk.	Average annual rainfall (inches).	Average number of rainy days in a year.
Kollegal	33·08	52·9

Palladam	22·78	39·9
Dharapuram	23·11	35·5
Pollachi	33·04	59·8
Udumalpet	23·99	37·4

The district has a generally dry climate. April and May are the hottest months. From June till September some rains of the South-west monsoon are had in Kollegal and Pollachi taluks. The country facing the Palghat Gap comprising the southern taluks of the district get the cool winds of the South-west monsoon. The climate in the Cauvery valley is generally hot, that in the higher plateau regions is less hot, though fever prevails in these regions. The district gets the benefit of the north-east monsoon also. But the north-east monsoon is not strong and assured. The plateau taluks get more rain than the rest of the district as they get some rains during the South-west monsoon also.

A statement showing the particulars of the monthly mean of daily maximum and daily minimum temperature, highest recorded and lowest recorded temperature and the monthly mean rainfall for the years 1881—1940 and similar particulars and actual rainfall for 1951 as recorded at Coimbatore is furnished below :—

(e) *Soils.*—The soils are chiefly red sand and gravel with a moderate area of red and black loam. The black cotton soil is generally considered the best and red sand the worst. The surface soils are thin and sub-soil consists of raw and semi decomposed rock. The talukwise distribution of soils on percentage basis is given below :—

(*f*) *Irrigation and drainage facilities and liability to famine.*—The district as a whole has poor rainfall—poorer than the adjoining districts. The rainfall is very low in Dharapuram and Palladam taluks. The fall is heaviest in the extreme south-west. Conditions would be bad indeed but for the existence of a large number of irrigation wells. As it is, the district is heavily deficit in foodgrains and is dependant on imports for a large part of its requirements. The principal sources of irrigation are the Bhavani, the Cauvery, the Amaravathi, the Noyyal and the Aliyar rivers. The first three are perennial. There are besides minor rivers and rainfed tanks. There are spring channels in a few taluks. Garden crops are irrigated from wells.

Details of irrigation facilities in each taluk are given below :—

Kollegal taluk.—The channels under the Cauvery directly irrigate some lands in Kollegal taluk. But the area irrigated is small. The taluk is not liable to famine.

Gobichettipalayam taluk.—The Kodiveri anicut across the Bhavani river irrigates 20,245 acres of land in the taluk and this is an important source of irrigation in the district. The taluk is not liable to famine.

Bhavani taluk.—The rivers Cauvery and the Bhavani unite in this taluk and the waters of these rivers irrigate some parts of the taluk. The rest of the taluk is served by rainfed tanks. The taluk is not normally liable to famine.

Avanashi taluk.—Irrigation of crops is done mostly from wells; and the Bhavani river and some rainfed tanks serve small extents. The taluk is not fertile. But it is not also generally affected by famine.

Erode taluk.—The Kalingarayan anicut across the Bhavani irrigates 12,239 acres of land in Erode taluk. The waters of the Cauvery also are utilised for irrigation. The taluk is not generally affected by famine though parts of it depending entirely on rainfall suffer distress when rains fail.

Coimbatore taluk.—Small areas are served by the Noyyal river and some tanks. There are also spring channels. The taluk is not liable to famine.

Palladam taluk.—Wells form the principal sources of supply for irrigation of crops. A small area is irrigated by the Noyyal river. Failure of rains creates sometimes famine conditions in this taluk.

Dharapuram taluk.—Amaravathi and Noyyal rivers serve small areas. Most of the irrigation is however done from wells. The taluk is chronically affected by scarcity conditions due to poor rainfall.

Pollachi taluk.—The wells form the principal sources of supply. There are also spring channels. A small area is irrigated by the Aliyar river. The taluk is not liable to famine as it gets the benefit of both the monsoons.

Udumalpet taluk.—Irrigation is mostly done by well water. A small area is irrigated by the Amaravathi river. Parts of the taluk are liable to famine.

The particulars of the number of minor and major irrigation sources and their ayacut in each taluk are furnished below :—

(*g*) *Area cultivated with food and commercial crops.*—A statement showing the area cultivated with food and commercial crops in the various taluks in 1948–49 which was the most recent normal year for the district is given in *Annexure I*.

(*h*) *Communications*—(i) *Roads.*—There are 3,609 miles of roads in the district comprising 78 miles of National Highways, 196 miles of Provincial Highways, 1,227 miles of major district roads, 651 miles of other district roads, 1,232 miles of village roads, 3 miles of Public Works Department roads, and

222 miles of municipal roads. Their talukwise distribution except in the case of Municipal and Public Works Department roads is given below :—

The condition of the roads in Avanashi, Pollachi, Palladam, Erode, Dharapuram and Udumalpet taluks is fair. The communications are adequate except in Kollegal taluk and in a few hill villages in Bhavani taluk. The general condition of the village roads in Coimbatore taluk is not satisfactory.

(ii) *Railways.*—There are $125\frac{3}{4}$ miles of broad gauge and $77\frac{3}{4}$ miles of metre gauge railway of the Southern Railway in Coimbatore district. The broad gauge line from Madras to the West Coast traverses the district. The broad gauge line connecting this with the Nilgiri Mountain Railway branches off from the main line from near Singanallur east of Coimbatore. The metre gauge line from Dindigul in Madurai district runs up to Coimbatore. A branch metre gauge line from Pollachi Junction runs up to Olavakkot Junction on the main West Coast line in Malabar district. II. (*a*) (i) *Growth of population.*—The particulars of population of the district and the taluks in 1941 and 1951 and the percentage of variation are furnished below :—

Name of district and taluk.	Population. 1941.	Population. 1951.	Percentage of variation.

"The recorded population of the district according to 1951 Census has registered an increase of 17·2 per cent as against 14·9 per cent in the previous decade. As might have been expected, the rural population has shown an increase of only 10·4 per cent, while the urban population has registered an increase of 56·4 per cent. The marked increases are in Gobichettipalayam taluk—27·5 per cent, Coimbatore taluk—36·9 per cent, and Pollachi taluk—21·5 per cent. As is well known, in this district, the taluks Palladam, Udumalpet, and notably Dharapuram are affected periodically by failure of crops—these are entirely dry taluks. The figures for the rural population in these taluks, viz., increase of only 1·9 per cent in Palladam, 2·4 per cent in Udumalpet taluk and a decrease of 0·7 per cent in Dharapuram taluk, reflect the series of adverse seasonal conditions, which have led to large scale migrations from these taluks. Gobichettipalayam taluk is a fertile and important grain producing area in the district and has attracted large

numbers of immigrants of the labouring classes from the Palladam, Dharapuram and Udumalpet taluks. The Lower Bhavani Project, which has been under execution and which has attracted thousands of labourers, is in this taluk. Pollachi has tea and coffee estates and also large scale groundnut cultivation, which have attracted large numbers of the labouring classes from Dharapuram, Palladam and Udumalpet taluks. In Coimbatore taluk, the dominant factor which has led to the large increase in population is its industrial development—mostly textile mills and associated industries in Coimbatore Municipality and its suburban areas."

(Extracted from the Census Report—Part I.)

(ii) *Vital statistics*.—A statement showing the particulars of births and deaths and deaths due to various causes for the decennium ending 1950 is given in *Annexure II*.

The average birth rate during the decade 1941–50 was 32·9 per mille which is slightly in excess of the rate of 31·7 for the State. Excepting for the years 1941 and 1942 when the birth rates were about 38·5 the annual rate varies little from the average for the decade. The average death rate of 19·2 was less than that for the State, 21·2. The recorded death rates decreased from 26·48 in 1943 to 14·55 in 1949 and increased to 18·94 in 1950. The infant mortality rates show a decline, the average for the first half and second half being 162·8 and 118·2 per 1,000 live births—a reduction of 27·5 per cent. A very severe cholera epidemic prevailed in the district in 1943 claiming a total of 9,649 lives and was mainly responsible for the sharp increase in general death rate in that year. The average death rates from smallpox and fevers (0·10 and 3·76 respectively) were less than those for the State. The incidence of plague was very high in the years 1943–47. The mortality from dysentery and diarrhoea was about the average for the State, that from respiratory diseases was higher than that of the State.

The average maternal mortality rate for the decade was 5·2 per 1,000 births against the rate of 8·1 for the State. A downward trend in the maternal mortality rate is also indicated from 1944.

(c) *Water-supply and drainage.*—The water-supply for drinking is had from wells and rivers. The Mettupalayam Municipality in Avanashi taluk has built a water-supply reservoir for which water is drawn from the Bhavani river. The Erode Municipality has provided a reservoir at Erode for which water is drawn from the Cauvery. Water is stored for Coimbatore town in the Siruvani Hills. The town gets the normal supply from this reservoir. To supplement this, a storage tank has been constructed at R.S. Puram. Some panchayats like Peelamedu and some Mill managements supply water to the public in lorries. Water-supply to Tiruppur Municipality is made available from a big well sunk in Koilvali five miles away from the town. For Pollachi Municipality a reservoir has been constructed at Pollachi and water is pumped into the reservoir from the Ambrampalayam river and supplied through taps. In Udumalpet town water is brought in lorries during the hot season. There is a proposal to supply water to the town from the Palar river.

There is open drainage arrangement in Mettupalayam Municipality in Avanashi taluk, Erode Municipality in Erode taluk, Coimbatore Municipality in Coimbatore taluk, Tiruppur Municipality in Palladam taluk and Pollachi Municipality in Pollachi taluk. Underground drainage is under construction in Coimbatore town.

Silk filatures	1	Not known.

V. *Items of general importance.*—Bhavani is noted for carpet weaving.

Silk reeling and twisting are done in the Government Silk Filatures at Kollegal.

Pollachi is a big trading centre. The weekly shandy attracts people from the neighbouring taluks. It caters to the needs of all classes and trades.

There is a Cotton, Tobacco and Groundnut Market Committee at Tiruppur, the country around which is one of the best cotton producing areas.

A dam across the Bhavani river which is said to be the world's longest earthen dam is under construction at Bhavani Sagar in Gobichettipalayam taluk, six furlongs below the river's confluence with the Moyar and 22 miles from Mettupalayam. The project is intended to bring under cultivation 207,000 acres in Coimbatore district. The project will also assure supply to the existing ayacut of 25,000 acres. Eventually it is also proposed to have a Hydro-Electric Power Station there.

Coimbatore, the headquarters of the district is a flourishing town with a very agreeable climate. In recent years it has become an important centre for textile industry. There are 20 spinning mills, 6 composite mills, one sugar manufacture plant, several coffee roasting factories and cotton ginning factories. The U.M.S. National Electric Works, the U.M.S. Radio Workshop and the P.S.G. Industrial Institute are three industrial institutions where training is also given to young men with aptitude for mechanics. The Pykara-Electric Scheme is responsible for the rapid industrial growth of the town. A cement factory, the output of which is the largest in South India is at Madukkarai about seven miles west of Coimbatore.

A—GENERAL POPULATION TABLES.

A-I—Area, Houses and Population.

This table shows for the rural and urban areas of each taluk and for the district, the area, the number of inhabited villages and towns, occupied houses and the total population with distribution by sex.

2. The district area shown within brackets in column (2) of this table is that supplied by the Surveyor-General of India. Area figures furnished by the Central Survey Office, Madras, have been adopted for the taluks. The total area of the taluks as furnished by the Central Survey Office, Madras, differs from the area of the district furnished by the Surveyor-General.

3. "Village" is the revenue administrative unit within defined boundaries. This table gives particulars in respect of all villages containing one or more groups of habitations. Villages with no habitations are not included in this table.

4. "Town" is a place of usually not less than 5,000 inhabitants possessing distinct urban characteristics. Cantonments have been treated as forming part of the towns in which they are situated.

5. "*House*".—Every dwelling with a separate main entrance has been treated as a house for census purposes.

16. COIMBATORE DISTRICT.

A-II—Variation in Population during fifty years (Talukwar).

This table compares the population of the district and of each taluk in the district as ascertained at the Census of 1951 with the corresponding figures of the five previous censuses. The figures recorded at the previous censuses have been adjusted for subsequent territorial changes, if any, in order to afford a correct basis for comparison. The adjusted figures show the population of taluks and the district as constituted at present.

Badagalpur village was transferred from Mysore State to this district in 1950.

16. COIMBATORE DISTRICT.

E—Summary figures by taluks.

The data contained in this table have been given for each taluk in the district.

2. The areas shown in column (2) of the table for the district and the taluk "total" are the latest figures furnished by the Central Survey Office, Madras. The areas given for "urban" are those furnished by the District Officers. The areas for "rural" have been obtained by deducting the figures for "urban" from those for district and taluk "total."

3. The district area furnished by the Surveyor-General, India, which has been shown in Table A-I, could not be adopted in this table as Talukwise figures have not been furnished by him. The district areas given by the Surveyor-General differ in varying degrees from those furnished by the Central Survey Office, Madras.

4. Previous census figures population have been adjusted with reference to the merger of States, transfer of enclaves, and inter district transfers, if any. The rural and urban population figures have been taken as they were at the 1941 and 1931 Censuses and as they are at the present Census, regardless of the changes of rural areas into urban areas and *vice versa* from census to census, for the purpose of calculating percentage variation between 1931 and 1941 and between 1941 and 1951. For calculating density for 'rural' and 'urban' for 1941, the areas of the town newly formed at the present Census rounded to the nearest square mile have been deducted from the areas given for urban in column (2) for 1951 and added to the areas given for 'rural', in the districts and taluks where new towns have been recognised.

3. *The livelihood classification is based on the principal* means of livelihood of the self-supporting persons, the principal means of livelihood for earning and non-earning dependants being the same as that of the self-supporting persons on whom they are dependant.

4. "The principal means of livelihood" is the means of livelihood which provides the largest or the major part of the income in the case of self-supporting persons who have more than one means of livelihood. In the case of other self-supporting persons it is the only means of livelihood.

5. A person has been regarded as "Self-supporting" if the income secured by the person is sufficient at least for his (or her) own maintenance at the level of living adopted by him (or her) at the time of the Census. The income secured may be in cash or kind. Anyone who is not a "Self-supporting" person in this sense has been regarded as a dependant. An "earning" dependant is a person who secures an income which is not sufficient to support him (or her). A person who does not secure any income either in cash or kind is a "non-earning dependant".

6. The non-earning dependants include persons performing house-work or other domestic or personal services for other members of the same family household, but do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise. These latter persons have been classed as either self-supporting or earning dependants according to the share of income attributable to them.

7. The self-supporting persons shown in Livelihood Class VIII include also persons who derive their income otherwise than through productive activity, i.e., persons coming under the following groups, details for which are given in the fly-leaf to Economic Table B-III :—

(1) Persons living principally on income from non-agricultural property ;

(2) persons living principally on pensions, remittances, scholarships and funds ;

(3) inmates of jails, asylums, alms houses and recipients of doles ;

(4) beggars and Vagrants ; and

(5) all other persons living principally on income derived from non-productive activity.

This table gives for the district the number of persons, in each of the eight livelihood classes mentioned in Economic Table B-I, who possess a secondary means of livelihood; and cross classifies them (according to the nature of such means of livelihood) under the same eight livelihood classes.

2. The secondary means of livelihood shown for self-supporting persons is the means of livelihood next in importance to their principal means of livelihood. In respect of earning dependants, it is the means of livelihood which provides the earning, or the largest part of their income if they have more than one source of income.

3. Non-earning dependants and self-supporting persons who have no secondary means of livelihood are excluded from this table.

16. COIMBATORE DISTRICT.

B-III—Employers, Employees and Independent Workers in Industries and Services by Divisions and Subdivisions.

This table gives figures for each Census tract in the district. The areas comprised in each Census tract denoted by its number in column (1) have been specified in the fly-leaf to Table B-I. In this table the self-supporting persons in the four non-agricultural classes given in Economic Table B-I are distributed in the various divisions and subdivisions of industries and services under the Indian Census Economic Classification Scheme, according to their secondary Economic Status, namely, employer, employee and independent worker.

2. (An) Employer (is) a person who employs other persons in order to carry on the business from which he secures his livelihood and pays them a salary or wage in cash or kind.

3. (An) Employee (is) a person who ordinarily works for some other person for a salary or a wage, whether in cash or in kind in order to earn his livelihood.

4. (An) Independent worker (is) a person who works on his own without being employed by anyone for a salary or wage and who does not also employ anyone else in order to earn his livelihood.

5. Under the New Indian Census Economic Classification Scheme all employers and independent workers have been classified with reference to the Commodity produced or services performed by them individually. As regards employees, all persons engaged in production, commerce, or Transport (and not being Domestic servants) have been classified with reference to their own activity and without reference to that of their employer. Domestic servants have been classified in one subdivision without reference to the nature of their work. All other employees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every discription) have been classified with reference to the commodity produced or services rendered by their Employers.

Coim.—6A

6. The Non-agricultural classes classified in Economic Table B-I, correspond to the divisions and subdivisions into which they are distributed in this table as follows :—

Livelihood class.	Division and subdivisions of the I.C.E.C. Scheme.
Class V—Production other than cultivation.	Division 0.—Primary Industries not else where specified. Division 1.—Mining and Quarrying. Division 2.—Processing and Manufacture of Foodstuffs, Textiles, Leather and Products thereof. Division 3.—Processing and Manufacture—Metals, Chemicals and Products thereof. Division 4.—Processing and Manufacture—Not elsewhere specified.
Class VI—Commerce.	Division 6.—Commerce.
Class VII—Transport.	Subdivisions 7·0 to 7·4 of Division 7.—Transport, Storage and Communications.
Class VIII—Other Services and Miscellaneous sources.	Division 5.—Construction and Utilities. Division 7.—Transport, Storage and Communications with the exception of subdivisions 7·0 to 7·4. Division 8.—Health, Education and Public Administration ; and Division 9.—Services not elsewhere specified.

Class VIII also includes persons who derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity), e.g., income from investments, pensions and family remittances, proceeds of begging and other unproductive activities. These are not, however, included in this table as it is limited to Industries and Services. Hence there will be a difference to this extent between the total self-supporting persons of the Non-agricultural class in Economic Table B-I and the total of this table. The reconciliation will be effected by adding the figures given in the next paragraph.

PART II

C—HOUSEHOLD AND AGE (SAMPLE) TABLES.

C-I—Household (size).

This table has been prepared in respect of a population covering the members of sample households selected from the entries in the National Register of Citizens on the basis of one household for every one thousand households. The sample households selected include roughly every tenth household in every hundredth house-numbering block in the Rural areas and every fiftieth household in every twentieth house-numbering block or locality in Urban areas.

2. The agricultural and the non-agricultural classes refer to the four agricultural and the four non-agricultural classes given in Table A-V. The Backward Classes include the Scheduled Castes, the Scheduled Tribes and other classes not treated as non-Backward by the State Government for the purpose of 1951 Census. Anglo-Indians are included among the non-Backward classes.

3. Columns (2) to (5) of the table relate to all the households and household population in the entire district while columns (6) to (17) relate to the sample households selected.

4. The figures have been given for each Census tract denoted by its number in column (1). The areas covered by each Census tract have been given in the fly-leaf to Table B-I.

C-II—Livelihood Classes by Age-groups.

This table shows the livelihood distribution by age-groups for Rural, Urban and District totals in respect of a sample population based on a ten per cent sample taken out when the enumeration slips were initially sorted. The ten per cent sample was taken out as follows :—

Each enumeration pad which consisted generally of 100 enumeration slips was broken and the slips relating to displaced persons which had been noticed during the process of the preliminary scrutiny were removed from the pack of slips for being dealt with separately. The pack was then " cut " as in a card-game. The lower portion was placed above the upper portion and the slips were dealt into two pigeon-holes one marked " G " and the other marked " S " as follows :

The first five slips were placed in the pigeon-hole " G ", then one slip was placed in the pigeon-hole " S ". Thereafter for every nine slips placed in the pigeon-hole " G ", one slip was placed in the pigeon-hole " S " until the total number of slips left was less than 9 and these residuary slips were all put into hole " G ". All the slips contained in the pigeon-hole marked " S " were taken out, counted and marked as " Sample " slips.

2. No smoothing formula has been adopted in preparing the table as in previous censuses and the figures have been tabulated as actually returned in suitable age-groups.

3. The figures under age " 0 " represent infants below one year.

C-IV—Age and Literacy.

This is yet another table prepared in respect of the *ten per cent samples of the general population* (vide fly-leaf to Table C-II).

2. Age-groups 0 and 1 to 4 given in Table C-II have been combined into one age-group, and the age-group **5** to 14 has been split into two sub-groups 5 to 9 and *10 to 14*. Persons of *age-group 0 to 4* are treated as illiterate.

3. The figures are given for each Census tract in the *district denoted by its number in column (1).* The areas covered by each Census tract have been specified in the fly-leaf to Table B-I.

4. 'Literates' are those who are able to read and write any simple letter in any language.

5. Persons who are partly literate, i.e., persons who are able to read only, have been included among the illiterates. Details for such persons are given below :—

2. The *circumstances* leading to the substitution of revised figures are briefly as *follows* :—

(i) At the time of sorting the enumeration slips in 1951, the sorters were given a list of the 77 Scheduled Castes shown in Roman type in the list in paragraph (ii) below. No instructions were given to the sorters as to how the slips were to be treated in the case of persons who returned themselves by a generic Scheduled Caste name such as Harijan or Depressed Class or Adivasi or by a recognized synonym such as Pulacheruman, Eralan, Kudan, Rolan, Alen, Paramban (for Cheruman), *with the result* that sorters in Tabulation Offices classified the communities according to their own interpretation. Consequently, a number of Scheduled Caste members who had returned themselves by generic names or by synonymous names were left out of the Scheduled Castes count. This situation came to the notice of the Government of India, who decided after careful consideration that persons who had returned themselves by generic or synonymous Scheduled Caste names should be counted as Scheduled Castes and that the Census Tables already published should be revised, where necessary, to show the correct position. In order to arrive at the correct figures of Scheduled Castes population a fresh sorting of the 1951 Census slips was accordingly organized in Madras.

(ii) Before commencing the sorting, a list of synonymous names, i.e., names synonymous with those of the communities published in the 'Constitution (Scheduled Castes) Order, 1950' was prepared in consultation with the Collectors of districts and sent to the State Governments of Madras and Andhra for acceptance. The list as finally accepted by the State Governments was got approved by the Government of India. Castes printed in Roman characters in the list below have been declared to be Scheduled Castes in the composite Madras State (as it existed *before the formation of the Andhra State*) by the 'Constitution (Scheduled Castes) Order, 1950' issued by the President under Article 341 (1) of the Constitution of India. The names in *italics* represent the synonyms of the names printed above them in Roman characters. The approved generic names adopted are the three names, Harijan, Depressed Class and Adivasi shown under Generic names, in the list below :—
